

# Moisture Protection For Your Building That Fits Like a Glove

## AkroGuard Air & Water-Resistive Barrier

One Membrane For Use Behind a Wide Variety of Claddings

As building codes become more stringent on having energy efficient buildings, air barriers are now required in new construction regardless of region or climate. AkroGuard is the ideal choice to achieve complete protection against both air and moisture intrusion. Formulated as a superior liquid applied membrane, AkroGuard provides a seamless protection, and with its self-sealing properties, is the ideal choice when used within mechanically attached system. We are so confident with the quality and performance of our product, that AkroGuard and comes with a 10-year warranty.

Ideal for use under:

Stucco & EIFS

Wood Siding

Vinyl & Cement  
Board Siding

Masonry & Stone

Metal Panels

# Increase Energy Efficiency and Cost Savings

## Fast & Easy Application Methods

**Spray-On**

**Roll-On**

**Trowel-On**

Unlike house wraps that easily tear and require nailing or stapling, AkroGuard provides tight and uniform protection that can be left exposed to the elements for up to 6 months. AkroGuard has been extensively tested and complies with ICC-ES Acceptance Criteria for WaterResistive Coatings (AC212) and meets the ASTM requirements as an air barrier.

AkroGuard is also much easier and faster to install than peel and stick membranes, and is the ideal solution to increase the added value of any building at a competitive cost.

### Features:

- Breathable
- Self sealing properties
- Excellent elongation properties
- Fast and easy application
- UV resistant
- 10 year Warranty

### Benefits:

- Reduced utility costs of the building
- Seamless protection
- Water-proofed building
- Can be left exposed to the elements for up to 6 months
- Resistant to tearing or punctures
- No need for mechanical attachments
- Improved indoor air quality
