

Looking for a scratch & brown that reduces cracking AND efflorescence?

Omega Super Cement is a premium plastering cement. Its compressive strength is one of the best on the market and is the ideal base coat to achieve a long-lasting and beautiful finish.

- High strength from the start
- Complies with IBC, IRC, ASTM C926 and ASTM C1328
- Superior alternative when portland cement with lime or plastic cement is specified
- Less alkali and reduced efflorescence
- Can reduce the need for control joints
- Easy to pump
- Factory blended - available fibered and non-fibered; pre-sanded or concentrate
- Available in one-hour-fire resistive assemblies
- Locally manufactured
- Best warranties in the industry: up to 15 years when used with selected Omega systems and finish options
