

Easily Clean Your Stucco Walls

Omega Stucco Cleaner is designed to dissolve dirt and typical stains from stucco walls and similar products. It is a concentrated, water-based detergent that will penetrate the surface to help remove stains without damaging the finish. Regular cleaning of stucco walls will keep them looking new for many years.

Stucco Cleaner can be used over cement-based stucco un-painted or painted, acrylic finishes, masonry or brick walls, concrete walls and siding.

Here's how it works:

-  1. Attach garden hose to the sprayer
-  2. Spray **WATER** only from the bottom up
-  3. Spray **STUCCO CLEANER** from top down
-  4. Wait 5-10 minutes. Scrub wall if necessary
-  5. Rinse **WATER** from the top down

Application

Test product on an inconspicuous area before applying to entire surface.

1. Attach garden hose to the sprayer with the sprayer valve in the "OFF" position.
2. Turn on water.
3. Turn sprayer valve to "WATER" position. Saturate the wall beginning at the bottom and working to the top. This will help prevent dirt residue from staining lower portions of the wall during cleaning.
4. After wetting the surface turn sprayer valve to "ON" position and spray the surface from the top down.
5. Allow cleaner to penetrate for 5-10 minutes. Do not allow surface to dry. It may be necessary to scrub heavy soiled or mildewed surfaces with a soft bristle brush. A secondary application may be needed. Do not use excessive pressure or abrasive methods while cleaning. It is typical for some stucco particles to be dislodged during the cleaning process.
6. Turn sprayer valve to "WATER" position and thoroughly rinse treated surface from the top down.

Limitations

- DO NOT** use excessive pressure or abrasive methods of cleaning.
- DO NOT** add any other materials to the product without written approval from Omega Products International.
- DO NOT** deviate application procedures contained in this, or any other Product Data Sheet, without written approval from Omega Products International.

Safety

- Avoid contact with eyes or prolonged contact with skin.
- In case of eye contact flush immediately with running water for at least 15 minutes. Consult a physician immediately.
- Be sure to provide adequate ventilation in enclosed areas.
- Wash thoroughly after handling.
- Use of an approved respirator is recommended.

KEEP OUT OF REACH OF CHILDREN.
