

THE PROFESSIONAL'S CHOICE SINCE 1974

# PROJECT PROFILE

## Origen Social Garden

### Lasting, Vibrant Colors

This beautiful project in sunny San Diego showcases Omega's premium stucco finish. ColorTek is manufactured from portland cement, hydrated lime, graded aggregates, and proprietary performance enhancing additives. It ensures lasting, uniform colors that resist UV, fading/discoloration, and comes in five aggregate combinations that allow design flexibility and a variety of finished textures. ColorTek aggregate combinations include Coarse, 20/30, 30/30, Smooth, and 16/20 (as displayed on this project), typically used to create traditional textures, sand finishes, or machine dash finishes.
